

that it is in the national interest of the United States to draw down articles and services from the inventory and resources of the Department of Defense, military education and training from the Department of Defense, and articles and services from the inventory and resources of the Departments of Justice, State, Transportation, and the Treasury for the purpose of providing international anti-narcotics assistance to Colombia, Peru, Ecuador, and Panama.

Therefore, I direct the drawdown of up to \$72.55 million of articles and services from the inventory and resources of the Departments of Defense, Transportation, Justice, State, and the Treasury, and military education and training from the Department of Defense, for Colombia, Peru, Ecuador, and Panama for the purposes and under the authorities of chapter 8 of part I of the Act.

As a matter of policy and consistent with past practice, my Administration will seek to ensure that the assistance furnished under this drawdown is not provided to any unit of any foreign country's security forces if that unit is credibly alleged to have committed gross violations of human rights unless the government of such country is taking effective measures to bring the responsible members of that unit to justice.

The Secretary of State is authorized and directed to report this determination to the Congress immediately and to arrange for its publication in the *Federal Register*.

**William J. Clinton**

**Proclamation 7228—National Breast Cancer Awareness Month, 1999**

*September 30, 1999*

*By the President of the United States  
of America*

**A Proclamation**

Across America today, women are living challenging, fulfilling lives, skillfully balancing the responsibilities of work, family, and community, and making plans for a bright future. But for thousands of these women each year, the diagnosis of breast cancer shatters the pattern of everyday existence. For millions more, the fear of such a

diagnosis casts a shadow across their lives. This year alone, an estimated 175,000 new cases will be diagnosed, and more than 43,000 women will die from breast cancer.

Despite these tragic statistics, we are beginning to see real progress in our national crusade against this disease. The breast cancer mortality rate in the United States has steadily declined over the past 10 years, and currently 2 million American women are winning the battle against this cancer.

Our steadfast commitment to breast cancer research is finally bearing fruit and has led the way to new preventative treatments. Last year, the National Cancer Institute's (NCI) landmark Breast Cancer Prevention Trial revealed that there were 49 percent fewer reported diagnoses among women who took tamoxifen. In another promising effort, researchers are looking at an alternate drug to see if we can achieve the same results but with fewer side effects.

Researchers are also conducting studies to determine if other medications can provide an effective weapon in our war against breast cancer. The Food and Drug Administration has recently approved the use of a new drug that has proved to be effective in the treatment of patients already in the advanced stages of this disease. Studies indicate that the drug may benefit 25 to 30 percent of women with advanced breast cancer. Encouraged by these findings, the NCI has rapidly expanded its study to include earlier stages of breast cancer and the treatment of other cancers, such as ovarian cancer.

We have also made promising strides in promoting the early detection of breast cancer, which is critical to prolonging patients' lives. A recent survey conducted by the NCI and the Health Care Financing Administration (HCFA) showed that 88 percent of women 65 years of age and older had undergone at least one mammogram during their lifetime—a 25 percent increase from 1992. Of the women who had a mammogram, 80 percent received their most recent test within the past 2 years, and more than 75 percent knew of Medicare's mammography coverage. The NCI and HCFA hope to build on this progress through their joint campaign to raise women's awareness of the importance of regularly scheduled mammograms and the

availability of Medicare mammography benefits.

The Centers for Disease Control and Prevention (CDC) has also played a vital role in combating breast cancer by providing access to screenings for medically underserved women. Authorized by the Breast and Cervical Cancer Mortality Prevention Act of 1990, the CDC's early detection program provides breast and cervical cancer screening services for women who might otherwise not receive them, such as older women, women with lower incomes, and women of color. This program has provided nearly 1 million mammograms, resulting in the diagnosis of more than 5,800 breast cancer cases.

Having lost my own mother to this devastating disease, I know all too well the pain and hardship that breast cancer inflicts on women and their families. I urge all Americans to join me in the crusade to prevent, treat, and ultimately eradicate breast cancer. By building on the breakthroughs we have achieved in research, prevention, and treatment and by promoting continued education and awareness, we can ensure that millions of women can look forward to longer lives and a brighter future.

**Now, Therefore, I, William J. Clinton,** President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim October 1999 as National Breast Cancer Awareness Month. I call upon government officials, businesses, communities, health care professionals, educators, volunteers, and all the people of the United States to publicly reaffirm our Nation's strong and continuing commitment to controlling and curing breast cancer.

**In Witness Whereof,** I have hereunto set my hand this thirtieth day of September, in the year of our Lord nineteen hundred and ninety-nine, and of the Independence of the United States of America the two hundred and twenty-fourth.

**William J. Clinton**

## **Proclamation 7229—National Disability Employment Awareness Month, 1999**

*September 30, 1999*

*By the President of the United States of America*

### **A Proclamation**

As Americans, we define ourselves in many ways—not only by our families and communities, but also by our work; not only by who we are, but also by what we do for a living. Millions of Americans with disabilities, however, do not share that experience because their path to the world of work has been strewn with barriers. At a time when the unemployment rate in our Nation is at the lowest level in a generation—4.2 percent—a staggering 75 percent of Americans with disabilities remain unemployed, even though the vast majority of them want to work.

One of the greatest barriers to employment for people with disabilities is that, under current law, they often become ineligible for Medicaid or Medicare if they work. That is why I have challenged the Congress to pass the bipartisan Work Incentives Improvement Act. This proposed legislation would extend Medicare coverage for people with disabilities who return to work and improve access to health care through Medicaid. No American should ever be forced to choose between health care coverage and employment, and this legislation will help ensure that no one has to make that choice.

In addition to fully funding the Work Incentives Improvement Act, my Administration's proposed budget includes a \$1,000 tax credit to help people with disabilities offset the cost of special transportation and other work-related expenses. We are also seeking to double our investment in such assistive technology as braille translators, mobile phones, and voice recognition software that give disabled citizens the tools they need to make the transition to work. And in June of this year, I signed an Executive order to expand employment opportunities for people with psychiatric disabilities and set an example for the private sector by ensuring that the Federal Government's hiring and promotion standards are the same for these
